

Asbestos Abatement Certification

Course Materials

Each student enrolled in the Asbestos Abatement course should be issued:

- Asbestos Abatement Manual
- Audio/Video Lectures:
 - Asbestos Abatement Part 1
 - Asbestos Abatement Part 2
- Asbestos Abatement Practice Exams:
 - Asbestos Abatement Test 1
 - Asbestos Abatement Test 2
 - Asbestos Abatement Update
- Asbestos Abatement Certificate Computer-Assisted Practice Tests

General Information

The Asbestos Abatement Manual briefly covers the major topics of the State exam including Assessments, Sampling, Lab Testing, Abatement Methods, Start-Up Sequence, Containment, Negative Air Systems, Clean-Up Sequence, Small Jobs, Asbestos-Related Diseases, and Respirators. The manual also contains summaries of Asbestos related laws.

The Asbestos Abatement Part 1 and Part 2 Lectures cover the information in the Asbestos Abatement manual.

Please be sure that your students study **all** of the practice exams. It is important to read and understand each question, and read every word of the explanations. It is necessary to learn the *principles* behind the question because the State's questions may be worded differently.

The Asbestos Abatement Certificate Computer-Assisted Practice Tests are supplied on a computer disk which will load a software program on the student's computer. The program presents questions one at a time, automatically scores the exam, presents the student with a grade, and lists each question answered incorrectly along with the correct answer.
