

C-21: Building Moving and Demolition

Course Materials

Each student enrolled in the Building Moving and Demolition course should be issued:

- Building Moving and Demolition (“C-21”) Manual
- Audio/Video Lectures:
 - Math Review
 - Health and Safety
- Building Moving and Demolition Practice Exams:
 - C-21 Test 1
 - C-21 Test 2
 - C-21 Update
 - Health and Safety
- C-21 Building Moving and Demolition Contractor’s Computer-Assisted Practice Tests

General Information

The Building Moving and Demolition Manual briefly covers the major topics of the State exam including Concrete, House Moving, Case Studies in House Moving, Cranes and Derricks, and Demolition. The manual also contains summaries of the Uniform Building Code. The last section of the Building Moving and Demolition Manual covers the Health and Safety Orders.

The Math Review Lecture covers the math formulas in the first part of the Building Moving and Demolition manual. The Health and Safety Lecture covers the Health and Safety Orders at the end of the Building Moving and Demolition manual.

Please be sure that your students study **all** of the practice exams. It is important to read and understand each question and read every word of the explanations. It is necessary to learn the *principles* behind the question because the State’s questions may be worded differently.

The C-21 Building Moving and Demolition Contractor’s Computer-Assisted Practice Tests are supplied on a computer disk which will load a software program on the student’s computer. The program presents questions one at a time, automatically scores the exam, presents the student with a grade, and lists each question answered incorrectly along with the correct answer.
