

C-6: Cabinet and Millwork

Course Materials

Each student enrolled in the Cabinet and Millwork course should be issued:

- Cabinet and Millwork ("C-6") Manual
- Audio/Video Lectures:
 - Math Review
 - Cabinet and Millwork (C-6)
 - Health and Safety
- Cabinet and Millwork Practice Exams:
 - C-6 Test 1
 - C-6 Test 2
 - C-6 Test 3
 - C-6 Test 4
 - C-6 Test 5
 - C-6 Update
- C-6 Cabinet and Millwork Contractor's Computer-Assisted Practice Tests

General Information

The Cabinet and Millwork Manual briefly covers the major topics of the State exam including Veneer, Abrasives, Adhesives, Wood Joints, and Doors. The manual also includes brief summaries of some of the Woodworking Institute of California's Standards as well as a Glossary. The last section of the Cabinet and Millwork Manual covers the Health and Safety Orders.

The Math Review Lecture covers the math formulas in the first part of the Cabinet and Millwork manual. The Cabinet and Millwork lecture covers the topics addressed in the manual specific to the C-6 trade exam. The Health and Safety Lecture covers the Health and Safety Orders at the end of the Cabinet and Millwork manual.

Please be sure that your students study **all** of the practice exams. It is important to read and understand each question, and read every word of the explanations. It is necessary to learn the *principles* behind the question because the State's questions may be worded differently.

The C-6 Cabinet and Millwork Contractor's Computer-Assisted Practice Tests are supplied on a computer disk which will load a software program on the student's computer. The program presents questions one at a time, automatically scores the exam, presents the student with a grade, and lists each question answered incorrectly along with the correct answer.
